

### John Deere

John Deere is adding three new plate compactors to its portfolio of over 100, offering customers more model options to choose from while maintaining the same reliability they've come to expect. The PC4, PC7, and PC10 plate compactor models deliver powerful performance and productivity. These attachments are compatible with the John Deere 26G, 30G, 35, 50G, and 60G compact excavators and the 310L, 310L EP, 310SL, 310SL HL, 315SL, and 410L backhoes.

### ClearSpan

ClearSpan Structures recently completed a 50-foot-wide by 60-foot-long gable-style Truss Arch Building for Granite Construction, providing coverage for the site's recycled asphalt shingles and protecting the aggregates from damaging outdoor elements. The building is constructed with materials of the highest quality, including a high-tensile fabric cover, a corrosion-resistant, triple-galvanized steel frame, and a durable block wall foundation. ClearSpan offers versatile building solutions with endless applications and economical prices.

### B2W Software

A new addition to the company's ONE Platform allows heavy construction contractors to centralize resource planning, scheduling, and dispatching processes and moves them online to allow real-time collaboration. Users across workflows can assign and view crews, labor, equipment, and material resources on desktop or mobile devices with customizable views. Individual users can manage scheduling based on their areas of responsibility—from scheduling crews to initiating requests and filling resource needs.

SOFTWARE

### TopCon

Future-proof your excavating. Get the X-53x (full 3D system) now or choose the X-52x (2D system) and easily upgrade later. No matter what you choose, you'll get more out of your excavating projects. The X-52x ensures you will always cut to the correct grade, while the X-53x upgrades your positioning assistance, reducing the need for stakeout, grading, and survey personnel. 3D systems show a 30% productivity increase over non-equipped machines.

### Doosan

The durable, Tier 4-compliant Doosan DX225MH-5 material handler is designed with a sturdy steel-track undercarriage and features enhancements in fuel efficiency, versatility, and productivity. It is factory-fitted with cab risers for increased visibility, straight boom and droop nose arm for peak performance, and additional machine guarding for boosted uptime protection. A 5/8-cubic-yard grapple is approved for use with the DX225MH-5 and features a semi-closed tine design for a firm grasp on most materials.
